

## FRONT END WEB DEVELOPER

Cleversteam is a web development agency. We have been around since 2010. We develop large Ruby On Rails Apps for a global client base in the Work & Travel and Sports Delivery sectors alongside building and maintaining our own products including Hanover, the cultural exchange CRM.

We're on the hunt for another developer to add to our expanding team. If you've got some of HTML , CSS, JS frameworks, React, SASS we want to hear from you. If you've got more let us know,

The role will involve developing and maintaining our front end websites, which include some of the largest content driven sites in their respective sectors, and taking admin interface designs and applying them to our systems

This may involve coming into contact with some Ruby code. It's important you're ok with that - support will be given,.

We are predominantly a team of Ruby on Rails developers so we would encourage and insist upon the successful candidate to bring ideas to the table and tell us what we should be doing when it comes to front end tech.

Most of our clients are based overseas. Mainly in the US. There are travel opportunities if you wish.

Full Time. Albert Dock, Liverpool. Salary, based on skills and experience.
